

NENOX FORGE

CODE OF CONDUCT & LEGAL PROTECTION POLICY

A consolidated governance framework for members, applicants & contributors

DOCUMENT	NeNoX Forge — Code of Conduct & Legal Protection Policy
PREPARED	September 12, 2026
CLASSIFICATION	Internal — members, applicants & contributors
SUPERSEDES	Original “Ironclad Legal Immunity, Liability Indemnity & Code of Conduct Agreement” (retained as Appendix A)
STATUS	Governance draft — pending review by qualified legal counsel

Internal governance document — not legal advice.

See Part 4 of the Legal Protection & Liability Policy before relying on any provision as a guarantee.

ABSOLUTE LEADERSHIP IMMUNITY MANDATE:

NeNoX Forge is an independent, non-incorporated, voluntary student hackathon collective. By joining, verifying on Discord, contributing to repositories, or filling out any application form, you acknowledge and agree that NeNoX Forge founders, student leaders, maintainers, and admins carry **ZERO LEGAL, FINANCIAL, OR ACADEMIC LIABILITY** for your individual actions, criminal activities, academic misconduct, or college policy violations. You operate strictly at your own legal risk.

ABOUT THIS DOCUMENT

This file brings together three related NeNoX Forge materials into a single reference:

- **Part I:** the Code of Conduct — a plain-language guide to how members are expected to operate day to day.
- **Part II:** the Legal Protection & Liability Policy — the governing framework of protections, and the limits of those protections, for leadership and members. It states that it supersedes the original agreement reproduced further below.
- **The final section:** the source “Ironclad Legal Immunity, Liability Indemnity & Code of Conduct Agreement,” kept for historical reference and completeness.

None of the three sections is a substitute for independent legal advice. Where they differ in tone or emphasis, **Part II** — the most recently drafted and most carefully scoped of the three — is the one intended to govern; the original agreement is retained for continuity rather than as the operative text.

PART I — CODE OF CONDUCT

1. Why This Exists

NeNoX Forge runs on self-driven builders who show up, execute, and move fast — nobody's chasing you for updates, and nobody's micromanaging your work. That's the deal, and it's a good one. But it comes with a trade-off worth naming out loud: we're an independent, unofficial student collective. There's no university backing us, no legal department, and no HR office to catch problems before they land on someone personally.

That's what this Code is for. It's not here to slow down the pace we're proud of — it's here so that pace doesn't quietly turn into a grade you lose, a Discord account you get banned from, a prize you never see, or something that follows you past graduation. Read it once now, and keep it in the back of your mind every time you're moving fast under a deadline — which, here, is most of the time.

2. Core Principles

► We're independent, and we act like it

NeNoX Forge is a self-organized student group — not a registered university club, and not an agent of any college. In practice:

- No member can sign contracts, make financial commitments, or speak on behalf of NeNoX Forge leadership or any university.
- Never put a college or university logo, seal, or letterhead on a NeNoX project, pitch deck, or repo without that institution's written permission first.
- If a university disciplinary board or law enforcement ever contacts you individually about something you did, that's between you and them. Leadership isn't in a position to intervene, defend you, or represent you.

► Security research stays inside the lines

If you're on the Ethical Hacker / Security Specialist track, your skills are one of the team's biggest advantages in a hackathon — and one of its biggest liabilities if pointed the wrong way.

- Never scan, probe, or run tools like Nmap, Metasploit, Burp Suite, or Wireshark against campus Wi-Fi, university servers, LMS platforms, or grading portals — not even “just to check,” not even out of curiosity.
- Keep every exploit, pentest, or security tool strictly inside hackathon-sanctioned targets or your own isolated test environment.
- Never store, share, or distribute pirated software, cracked license keys, or leaked confidential material on our Discord or GitHub.

This isn't a gray area. Unauthorized access to real infrastructure is the fastest way to be permanently removed from the team — and it can carry real legal consequences that have nothing to do with NeNoX Forge at all.

► Keep hackathon work and coursework separate

- Our Discord, GitHub org, and shared drives exist for building hackathon projects — not for trading exam questions, completing someone else's graded assignment, or any other form of academic dishonesty.

- Make sure any code you submit to a hackathon is genuinely yours or properly licensed. Using someone else's code or IP without the right to do so is a risk you're taking individually, not the team.
- **Prize money and IP are a team matter**
- Cash prizes, bounties, hardware, or grants belong to the individual project team, split however your team agreed — not to NeNoX Forge leadership.
 - Leadership won't hold funds, divide winnings, or arbitrate a dispute between teammates. Work out splits and ownership before you compete, not after.
 - Reporting winnings for tax purposes is your own responsibility.
- **Represent the team the way you'd want to be represented**
- Don't publish false or damaging claims about NeNoX Forge, its founders, or maintainers on social media, forums, or anywhere else. If something's genuinely wrong, bring it to leadership first (Section 4) — most frustrations are fixable in a conversation that turn messy in public.
 - Don't give interviews, press statements, or public posts claiming to speak for NeNoX Forge leadership unless you've been explicitly asked to.

► **Membership is at-will, both directions**

Joining is voluntary, and so is staying. Leadership can remove your access or membership at any time, for any reason, without building a formal case for it — that's not a threat, it's just how a volunteer collective without an HR process has to operate. You're just as free to walk away whenever you want.

3. In Practice: Do's and Don'ts

You're the security lead and want to check how strong the campus Wi-Fi actually is.

✗ DON'T

Run so much as a port scan against any university network, portal, or server — even without touching anything.

✓ DO

Spin up your own isolated lab (home network, VM, cloud sandbox), or stick to whatever environment the hackathon organizers explicitly mark as fair game.

A teammate drops last semester's midterm questions in the group Discord “to help everyone out.”

✗ DON'T

Share it, or use any NeNoX channel to trade coursework, answers, or graded material.

✓ DO

Point people to your school's actual tutoring or office-hour resources, and flag it to a lead if it keeps happening.

Your pitch deck would look sharper with your university's logo on the title slide.

✗ DON'T

Add it without asking.

✓ DO

Get written permission from your school's communications office first, or just design around your team's own branding instead.

Your team just won a hackathon and two members disagree about how to split the prize.

X DON'T Expect a NeNoX founder to referee it or hold the funds until it's sorted out.	✓ DO Settle splits and IP ownership with your team in writing before the hackathon, so there's nothing left to fight about after.
---	---

You're frustrated with a call a lead made and you're tempted to vent on Reddit or X.	
X DON'T Post it publicly, especially anything exaggerated or untrue.	✓ DO Message a lead directly, or raise it through the reporting process — it gets resolved faster in a real conversation than in a public thread.

4. Seeking Guidance & Reporting

- **Not sure if something crosses a line?:** Ask before you act, not after. Drop a question to a team lead directly, or in the designated Discord channel.
- **Want to report a concern:** someone's conduct, a security or academic-integrity issue, or a team dispute you can't resolve on your own? Message a lead directly, or use the private mod-only channel.
- **Asking or reporting in good faith is never held against you:** even if the answer turns out to be “you're fine, don't worry about it.” The behaviors in Sections 2 and 3 are what get someone removed, never the act of raising a question or a concern about them.

We're a volunteer student group, not a company with a formal HR department, so we can't promise a corporate-style investigation process. What we can promise is that every report gets taken seriously and handled as privately as the situation allows.

5. Accountability

If This Happens	Here's What Follows
Targeting campus Wi-Fi, servers, or portals	Immediate, permanent removal — plus full cooperation with law enforcement or your college if it goes that far
Sharing exam material, cheating tools, or facilitating academic dishonesty	Zero-tolerance ban and removal of the related content; leadership won't get involved in your disciplinary hearing
Using college branding without permission	You'll be asked to rename or rebrand the project and pull the logo; NeNoX may need to issue a public disclaimer
Prize or equity disputes	Leadership stays out of it entirely — no holding, mediating, or distributing contested funds
Spreading false or damaging claims about the team	Immediate removal, and depending on severity, this can escalate further
Injury, illness, or accidents during hackathon travel	This sits with you individually — NeNoX doesn't carry travel or health liability for members

None of this exists to make your life harder. It exists so the pace and trust that make NeNoX Forge work don't get burned by something avoidable — for the team, and for you personally.

A quick, honest note (not legal advice): this Code translates NeNoX Forge's internal waiver/liability document into plain language for members — it doesn't replace that original agreement. Worth knowing: some of the original's broader language (treating a Discord or form-submission “verification” as automatically creating a binding legal waiver, or trying to disclaim liability for things like gross negligence or someone else's criminal conduct) may not hold up exactly as written if it were ever tested. If leadership wants real legal protection rather than just strongly worded language, it's worth having an actual attorney review and draft the underlying agreement. I'm not a lawyer, and this document doesn't make one unnecessary.

PART II — LEGAL PROTECTION & LIABILITY POLICY

Cross-checked against and superseding the prior “Ironclad Legal Immunity, Liability Indemnity & Code of Conduct Agreement” — this version consolidates and expands protection across three specific risk domains.

Purpose & Scope

This policy exists to protect NeNoX Forge leadership, maintainers, and the collective as a whole against legal exposure arising from three distinct sources:

- Action or complaint from a college or university.
- Action or complaint from a NeNoX Forge member or student.
- Legal trouble caused by the unauthorized or illegal conduct of any individual — member or leader — acting outside the scope of what NeNoX Forge sanctions.

Read Part 4 before treating any of this as a guarantee. It explains, plainly, what a policy like this can and cannot actually do — that part is not boilerplate, it's the difference between real protection and a false sense of security.

Part 1 — Protection Against Institutional (College/University) Action

1.1 Independent, Unaffiliated Status

NeNoX Forge is a self-organized, non-incorporated student collective. It is not a registered club, department, or agent of any college or university, and it does not act under any institution's charter or authority.

1.2 No Authority to Bind the Institution or NeNoX

No member, applicant, or contributor — regardless of rank — has authority to sign agreements, make representations, or incur obligations on behalf of a college, university, or NeNoX Forge leadership.

1.3 Branding & IP Restriction

No college or university logo, seal, letterhead, or trademark may appear on any NeNoX Forge project, pitch deck, repository, or public material without that institution's prior written consent. Violations are treated as the responsibility of the individual who used the mark, not the collective.

1.4 Response Protocol for Institutional Complaints

If a college or university raises a complaint or inquiry directed at NeNoX Forge as a group:

- A single designated leadership contact handles all communication with the institution — members should not respond independently on the group's behalf.
- NeNoX Forge will state, in writing if requested, that it is an independent, unaffiliated student collective and will direct the institution to the individual(s) whose conduct is actually in question.
- NeNoX Forge will cooperate with legitimate institutional inquiries but will not accept liability, on behalf of the collective, for conduct undertaken by an individual outside any authorized NeNoX activity.

1.5 Indemnification for College-Related Costs

A member whose individual conduct causes a college or university to bring a complaint, disciplinary action, or cost against NeNoX Forge leadership agrees to indemnify leadership for reasonable costs directly resulting from that member's conduct, to the extent enforceable under applicable law (see Part 4).

Part 2 — Protection Against Legal Action or Complaints From Members/Students

2.1 Assumption of Risk

Participation in NeNoX Forge — including hackathons, travel, late-night build sessions, and related activities — is voluntary. Members assume personal responsibility for ordinary risks of participation (time, health, travel, and similar) that are inherent to a volunteer hackathon collective, not caused by leadership's own misconduct.

2.2 Release of Claims for Discretionary Leadership Decisions

Members agree not to bring legal claims against leadership arising from good-faith, non-discriminatory discretionary decisions, including: who is admitted or rejected, role and team assignments, removal of membership or access, and allocation of shared resources (Discord roles, repo access, mentorship time). This release does not extend to decisions that violate anti-discrimination law, other mandatory legal protections, or that are made in bad faith (see 2.6 and Part 4).

2.3 Mandatory Internal Resolution Before External Action

Before pursuing external legal action against NeNoX Forge or its leadership over an internal dispute, a member agrees to first raise the issue through the internal reporting process (per the Code of Conduct) and give leadership a reasonable opportunity to respond. This does not apply to matters involving actual crimes, immediate safety concerns, or rights that cannot be waived under Part 2.6.

2.4 No Fiduciary or Escrow Role in Prize & IP Matters

Leadership does not hold, distribute, mediate, or arbitrate hackathon prize money, equity, or IP disputes between members. Members release leadership from claims connected to how a team chose to split winnings, credit, or ownership — that agreement is the team's own responsibility, ideally documented in writing before competing.

2.5 Non-Disparagement / Dispute Conduct

Members agree to raise good-faith complaints through the internal process rather than through public claims that are false or made with reckless disregard for the truth. This is not a gag order on honest criticism or on legally protected reporting (Part 2.6) — it specifically targets knowingly false or defamatory statements.

2.6 Rights That Cannot Be Waived

Nothing in this policy waives, and nothing NeNoX Forge can ask a member to sign waives, a person's right to: report harassment, discrimination, or unsafe conduct to actual authorities or their institution; file a complaint with a government agency; or exercise any other statutory right that is non-waivable under applicable law. Any clause read to conflict with this section is void to that extent.

Part 3 — Individual Responsibility & Liability Isolation

This is the section directly addressing unauthorized or illegal conduct — including unauthorized hacking — by any individual, at any level of the organization.

3.1 Sole Individual Responsibility Principle

Legal responsibility for any unauthorized or illegal act — including unauthorized computer access, hacking outside an approved hackathon scope, academic dishonesty, IP theft, or any other violation of law or institutional policy — rests solely and personally with the individual(s) who actually committed it. This applies identically whether that individual is a general member or part of leadership. Rank confers no exception.

3.2 No Vicarious Liability / Non-Ratification

Such conduct is, by definition, outside anything NeNoX Forge authorizes. It is never sanctioned, directed, endorsed, or ratified by the collective or by any individual who did not personally participate in it. NeNoX Forge's authorized scope for security research is limited strictly to sanctioned hackathon environments and personal isolated testbeds, as set out in the Code of Conduct — nothing outside that scope is done “as NeNoX Forge.”

3.3 Mutual Isolation Across Ranks

Because responsibility is individual, one person's unauthorized illegal act does not, by itself, create legal liability, disciplinary exposure, or reputational imputation for: other members, other leaders, or NeNoX Forge as a collective, provided those other individuals neither directed, knowingly participated in, nor knowingly permitted the act to continue. This isolation runs in both directions: a rogue member's conduct doesn't taint leadership, and a leader's individual, unauthorized misconduct doesn't taint the membership or other leaders who had no part in it.

3.4 Leadership Duty Upon Discovery

If leadership becomes aware that anyone — member or fellow leader — is using NeNoX Forge's name, infrastructure, or resources for illegal hacking or similar unlawful conduct, leadership is expected to: immediately disassociate NeNoX Forge from the conduct, remove the individual's access, and cooperate with legitimate law enforcement or institutional inquiries. Acting promptly on discovery is itself part of what keeps liability isolated to the individual — knowingly ignoring it is one of the few things that can pull leadership back in (see Part 4).

3.5 Explicit Non-Immunity for the Actor — Read This

This section isolates other people from someone else's unauthorized conduct. It does not, and legally cannot, protect the person who actually committed the act — including a leader — from the consequences of their own conduct. If a “higher up” personally engages in illegal hacking, they are individually exposed exactly as any other member would be. Leadership status is not a shield for the person exercising it; if anything, directing, encouraging, or knowingly covering up someone else's illegal act as a leader can create additional exposure for that leader (e.g., for conspiracy, aiding, or obstruction), not less.

Part 4 — What This Policy Can and Cannot Legally Do

This part matters more than any clause above it, so it's written straight, not buried in legalese:

- **It cannot override criminal law.** No internal policy, waiver, checkbox, or “digital verification” can prevent a prosecutor, court, or college disciplinary board from pursuing an individual — member or leader — for something they actually did. That is true no matter how the document is worded.
- **It cannot bind people who never agreed to it.** A college, a law enforcement agency, or an outside person harmed by someone's conduct is not a party to this policy and isn't bound by it. It only governs the relationship between NeNoX Forge and the members who accept it.
- **It cannot waive rights the law says can't be waived** (see Part 2.6) — attempts to do so are simply unenforceable, not “extra protective.”
- **It is weak or void against gross negligence and intentional wrongdoing.** Courts in most jurisdictions won't enforce a waiver that tries to excuse reckless or intentional harm, or genuine criminal conduct — writing it more forcefully doesn't fix this.
- **A leader's own knowledge or involvement isn't cured by this document.** If leadership actually knew about, directed, or concealed someone's illegal hacking, this policy doesn't erase that; it can't.

- **Treat this as an internal governance document, not a substitute for real legal counsel.** For anything you intend to actually enforce or rely on — especially given that “unauthorized hacking” carries real criminal exposure — have an attorney (or your college's student-org legal resource, if one exists) review and, ideally, formalize this properly, with genuine informed consent rather than a checkbox.

Part 5 — Acceptance & Acknowledgment

By joining NeNoX Forge, verifying on Discord/GitHub, or submitting an application, I acknowledge:

- ☐ NeNoX Forge is an independent, unaffiliated student collective, and I will not represent otherwise to my college or the public.
- ☐ I will never use NeNoX Forge's name, tools, or infrastructure to access any system without explicit authorization — including campus networks, servers, or portals.
- ☐ I understand that if I personally engage in unauthorized or illegal conduct, that responsibility is mine alone — regardless of my role in NeNoX Forge — and no part of this policy protects me from the consequences of my own actions.
- ☐ I understand this same principle protects other members and leaders from being held responsible for conduct they didn't direct or participate in.
- ☐ I agree to raise disputes through the internal process described in the Code of Conduct before pursuing outside action, except where the law gives me the right to act directly (e.g., reporting harassment, discrimination, or a crime).

Member Full Name:

College / University:

GitHub / Discord Username:

Signature / Digital Verification:

Date:

Not legal advice. This document was drafted to be internally consistent and as protective as a policy honestly can be — but it's a governance framework, not a courtroom guarantee. Have it reviewed by an actual attorney before relying on it, particularly given the hacking-related risk it's meant to address.

APPENDIX A — ORIGINAL GOVERNING AGREEMENT (REFERENCE COPY)

The text below is reproduced as originally drafted. Part II states that it supersedes this agreement; it is kept here for historical reference and completeness, not as the operative policy.

IRONCLAD LEGAL IMMUNITY, LIABILITY INDEMNITY & CODE OF CONDUCT AGREEMENT

Irrevocable Legal Shield, Hold-Harmless Waiver & Risk Release Executed by Members, Applicants, and Contributors

Target Protected Entities: NeNoX Forge Founders, Core Leadership, Project Maintainers, and Infrastructure Admins

ABSOLUTE LEADERSHIP IMMUNITY MANDATE: NeNoX Forge is an independent, non-incorporated, voluntary student hackathon collective. By joining, verifying on Discord, contributing to repositories, or filling out any application form, you acknowledge and agree that NeNoX Forge founders, student leaders, maintainers, and admins carry ZERO LEGAL, FINANCIAL, OR ACADEMIC LIABILITY for your individual actions, criminal activities, academic misconduct, or college policy violations. You operate strictly at your own legal risk.

1. Institutional Independence & Non-Affiliation

- **Unofficial Student Group Disclaimer:** NeNoX Forge is an autonomous student-led group and is NOT an official department, registered club, or agent of any college, university, or academic institute.
- **No Authority to Bind Institutions or Leaders:** No member or applicant has the authority to sign contracts, issue statements, or incur legal/financial debt on behalf of NeNoX Forge leaders or any university.
- **Strict Prohibition on College Branding:** Members are legally prohibited from using any college or university logo, seal, letterhead, or official trademark on NeNoX Forge projects or pitch decks without prior official college administrative consent.
- **Individual Legal Isolation:** Any legal inquiry, university disciplinary board, or law enforcement action targeted at a member applies strictly to that individual. Leaders bear no legal duty to intervene, defend, or represent the member.

2. Cybersecurity, Ethical Hacking & Infrastructure Immunity

- **Campus Infrastructure Protection Clause:** Ethical hackers and security specialists must NEVER target, scan, probe, or attempt penetration testing against campus Wi-Fi, university servers, grading portals, LMS platforms, or institutional databases. Doing so constitutes unauthorized access under applicable computer misuse acts and results in immediate expulsion and disavowal.
- **Authorized Hackathon Scopes Only:** All security research, exploit scripts, and tool usages (Nmap, Metasploit, Burp Suite, Wireshark) must strictly occur within explicitly permitted hackathon target environments or isolated personal testbeds.
- **DMCA & Anti-Piracy Safe Harbor:** NeNoX Forge servers (Discord, GitHub) operate under strict compliance with DMCA safe harbor rules. Storing, sharing, or distributing copyrighted software, cracked keys, or confidential leaks is strictly forbidden. Leadership holds no liability for user-submitted content.

- **Zero Legal Assistance:** NeNoX Forge leaders will provide no legal defense, bail money, legal representation, or character references if a member is prosecuted for unauthorized cyber activities.

3. Academic Integrity & Coursework Firewall

- **Strict Coursework Separation:** NeNoX Forge communication channels, GitHub organizations, and shared drives shall NEVER be used for sharing exam questions, completing graded individual college assignments, or facilitating academic cheating.
- **Open-Source & Hackathon IP Compliance:** Members retain personal responsibility for ensuring code submitted to hackathons is original or properly licensed under open-source standards. Submitting stolen code or violating third-party IP is strictly at the individual's legal risk.
- **Zero Tolerance & Immediate Removal:** Any member using NeNoX Forge infrastructure for academic dishonesty will be permanently banned immediately, and all related content will be purged without notice.

4. Cash Prizes, Hardware & Financial Dispute Waiver

- **Team Cash / Grant Agreements:** All cash prizes, hackathon bounties, hardware awards, or venture grants won during competitions belong strictly to the individual project team members based on their private team contracts.
- **Leader Non-Involvement in Money Disputes:** NeNoX Forge founders and leadership hold no financial stake in hackathon payouts and will NOT act as mediators, escrow agents, or arbitrators for cash or equity disputes among team members.
- **Tax & Personal Financial Responsibility:** Members are solely responsible for declaring prize winnings, taxes, or legal reporting required by state or federal tax authorities.

5. Non-Disparagement & Public Statements Protection

- **Social Media & Forum Disparagement Prohibition:** Members agree not to publish false, defamatory, or damaging statements regarding NeNoX Forge, its founders, or maintainers on social media, Reddit, college forums, or messaging platforms during or after their membership.
- **Unauthorized Public Statements:** No member may issue press releases, media interviews, or public blog posts claiming to speak for NeNoX Forge leadership without explicit written approval.

6. At-Will Membership & Unilateral Revocation

- **At-Will Termination:** Membership in NeNoX Forge is entirely voluntary and granted 'at-will'. Leadership reserves the absolute right to revoke membership, remove Discord roles, and restrict repository access at any time, for any reason, without notice or legal liability.
- **Severability Clause:** If any provision of this agreement is held to be invalid or unenforceable by a court of law, that provision shall be modified to reflect the parties' intent, and all remaining provisions shall continue in full force and effect.

7. Comprehensive Risk Protection & Action Matrix

Legal & Drama Domain	Prohibited Member Activity	Leadership Protection & Immediate Action Protocol
Campus Hacking Attacks	Probing, scanning, or hacking college Wi-Fi/servers.	Immediate permanent ban, full disavowal, complete cooperation with law enforcement/college boards.
Academic Dishonesty	Sharing exam leaks, coursework, or cheating tools.	Zero-tolerance ban, deletion of content, zero leadership involvement in disciplinary hearings.
College IP & Logo Misuse	Using college branding on projects without approval.	Forced project name change, removal of logos, public disclaimer issuance.
Prize Money Conflicts	Member disputes over cash prizes or equity split.	Complete leadership immunity; leaders do not hold, mediate, or distribute contested funds.
Slander & Defamation	Spreading toxic drama or false claims on social media.	Immediate expulsion, revocation of credentials, potential legal cease-and-desist action.
Hackathon Travel / Health	Injuries, accidents, or illness during hackathon trips.	100% individual liability waiver; NeNoX Forge holds zero travel/health responsibility.

8. Irrevocable Hold Harmless & Indemnification Covenant

BY JOINING NENOX FORGE, VERIFYING YOUR DISCORD/GITHUB ACCOUNT, OR SUBMITTING AN APPLICATION, YOU FOREVER RELEASE, WAIVE, INDEMNIFY, AND HOLD HARMLESS NENOX FORGE FOUNDERS, STUDENT LEADS, MAINTAINERS, AND ADVISORS FROM ANY AND ALL CLAIMS, LOSSES, LIABILITIES, DAMAGES, LEGAL FEES, COLLEGE DISCIPLINARY PROCEEDINGS, OR CRIMINAL INVESTIGATIONS ARISING DIRECTLY OR INDIRECTLY FROM YOUR PARTICIPATION, CODE SUBMISSIONS, SECURITY RESEARCH, OR PERSONAL CONDUCT.

Digital Acceptance & Binding Member Acknowledgement

- ☐ I acknowledge NeNoX Forge is an independent student group and agree to hold leaders 100% legally & financially harmless.
- ☐ I promise NEVER to target college infrastructure, campus Wi-Fi, or share academic coursework/cheating material.
- ☐ I agree that all prize money, project IP, and team disputes are strictly between individual members.
- ☐ I accept that digital verification (Discord / GitHub / Form submission) constitutes a legally binding acceptance of this policy.
